Project Design Phase-II Data Flow Diagram & User Stories

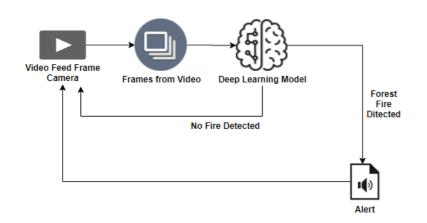

Date	4 November 2022
Team ID	PNT2022TMID29323
Project Name	Emerging Methods for Early Detection of Forest Fires
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and wheredata is stored.

Example:

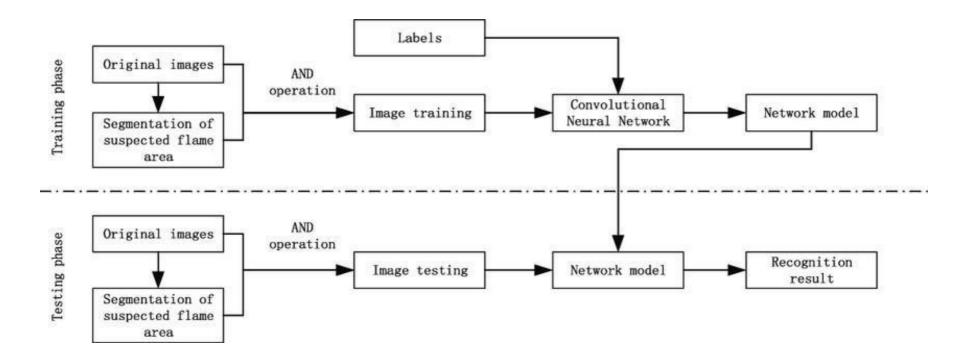

FLOW

- $\ \square$ It is difficult to predict and detect Forest Fire in a vast forest area.
- ☐ it is more difficult if the prediction is done using ground-based methods like Cameraor Video-Based approach.
- Satellites can be an important source of data prior to and also during the Fire due toits reliability and efficiency.
- The various real-time forest fire detection and prediction approaches, with the goal of informing the local fire authorities.

.

DFD:

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story I Task	Acceptance criteria	Priority	Release
Environmentalist	Collect the data	USN-1	As an Environmentalist it is necessary to collect the data of the forest which includes temperature, humidity,rain,etc	It is necessary to collect the right data else the prediction may become wrong	High	Sprint-1
		USN-2	Identify algorithms that can be used for prediction	To collect the algorithm to identify the accuracy level of each algorithms	Medium	Sprint-2
	Implement Algorithm	USN-3	Identify the accuracy of each algorithms	Accuracy of each algorithm-calculatedso that it is easy to obtain the most accurate output	High	Sprint-2
		USN-4	Evaluate the Dataset	Data is evaluated before processing	Medium	Sprint-1
	Evaluate Accuracy of Algorithm	USN-5	Identify accuracy, precision, recallof each algorithms.	These values are important for obtaining the right output	High	Sprint-3
	Display Results	USN-6	Outputs from each algorithm are obtained.	It is highly usedto predict the effect and to take precautionary measures.	High	Sprint-4
